

**Internet Security:**

Agencies not utilizing an LGNET/POP connection may access the MiCJIN portal via the Internet. However, a token is necessary and will provide a two-factor authentication for the user accessing the State applications via the Internet. State Police, Criminal Justice Information Center, Agency Access Coordinator, will send the token to the agency approximately 4-6 weeks after the application is received.

Charges for the token are \$11 per month per user. State Police will bill the local agency quarterly for the token.
